News

NOAA Central Library is excited to announce that our new discovery platform, replacing our old online catalog – goes live June 7th.

- A new search interface - all content provided by NOAA libraries through one search bar.
- Enhanced Library Account Management
- Serendipitous discovery via virtual browsing

Look out for our follow-up email introducing Ex Libris Primo VE on June 7th!

PLOS CLIMATE

We're covering your publishing fees! NOAA Central Library & PLOS Climate

Starting June 1st the NOAA Central Library will cover NOAA corresponding authors' article processing charges (APCs) when they publish in [PLOS Climate](#).

More details on how to take advantage of this opportunity will be sent in a separate email NOAA-wide. Stay tuned!

Register for an ORCID

It is recommended that all NOAA authors and grantees ensure they are [registered with ORCID](#) and have an up-to-date profile in order to make their research more open and discoverable. In addition, grantees may hear more about digital persistent identifiers, like ORCID, in relation to the [Presidential Memorandum on United States Government-Supported Research and Development National Security Policy](#) (NSPM-33).

Watch our recent seminar on ORCID here:

Staff Corner

Hi, I'm Sean - library technical services contractor with MPF-ZAI working at NOAA Central Library. I've been 1 of 2 in-person staff for much of these past two years (last month's spotlighted staff Omar, being the other). I'm native to Washington, DC and I am an avid vinyl collector, loving all things music related. My collection is 3,000 records and growing.

My job is to help manage our physical collection and work to get our library ready for reorganization changes. I take inventory, physically move and assess the collection and assist in digitization of our older, rare material.

Sean Jones
